Harvey Square Ridge

The Harvey Square Ridge is a purpose-designed roofing accessory used to cover and protect ridge (apex) lines on Harvey roof systems. Featuring a clean, square-profile design, it offers a modern, structured finish while ensuring reliable weatherproofing and structural integrity. Manufactured from coated steel, it is built for durability and long-term performance.

Specification	Value
Application	Roof ridge / apex lines
Installation Method	Fixed to single battens
Approx. Length	1720 mm (1600 mm cover)
Width	48 mm (tapered)
Height	70 mm
Mass	1.8 kg

Key Features & Benefits

Secure Hip Termination

- Closes off exposed ends of angle hip caps
- Prevents water ingress and wind-driven rain at vulnerable points
- Enhances overall roof system performance

Weatherproof Protection

- Acts as a sealing component at hip terminations
- Reduces risk of leaks, debris ingress, and moisture build-up
- Supports long-term durability of the roofing system

Durable Steel Construction

- Manufactured from corrosion-resistant coated steel
- Designed to withstand harsh environmental conditions
- Matches the durability of Harvey roof tiles

Precision Fit

- Specifically engineered for Harvey Angle Hip Cap systems
- Ensures a tight, secure fit for consistent installation
- Maintains structural and aesthetic integrity

Professional Finish

- Provides a neat and complete appearance at the end of hip lines
- Eliminates exposed edges
- Matches tile profiles and colours for visual consistency

Easy Installation

- Fixed to the end of angle hip sections
- Lightweight and easy to handle
- Compatible with standard fastening methods
