Harvey Square Hip Cap

The Harvey Square Hip Cap is a high-quality roofing accessory designed to cover and protect hip lines on Harvey roof systems. Featuring a clean, square-profile design, it provides a modern finish while ensuring a secure, weathertight seal at external roof angles. Manufactured from durable coated steel, it delivers long-lasting performance and seamless integration with Harvey Elite tiles.

Specification	Value
Application	Roof hip lines (external angles)
Installation Method	Fixed to single hip batten
Approx. Length	580 mm (covers 1 tile course)
Width	48 mm (tapered to ± 45 mm)
Height	42 mm (tapered up)
Mass	0.5 kg

Key Features & Benefits

Hip Line Protection

- Covers and seals external roof angles (hips)
- Protects against water ingress and wind uplift
- Reinforces critical structural areas of the roof

Modern Square Profile

- Sleek, square-edged design for a contemporary look
- Provides a consistent and professional finish along hip lines
- Perfect match for modern roofing aesthetics

Durable Steel Construction

- Manufactured from corrosion-resistant coated steel
- Designed for long-term outdoor performance
- Withstands harsh environmental and weather conditions

Precision Fit

- Engineered specifically for Harvey Elite roof tiles
- Ensures accurate alignment and secure fixing
- Maintains the integrity of the roofing system

Weatherproof Performance

- Eliminates gaps at hip intersections
- Resistant to rain, wind, hail, and dust ingress
- Supports a fully leakproof roofing system

Easy Installation

- Fixed to hip battens
- Covers one tile course per cap
- Lightweight and easy to handle for fast installation
