Harvey Bargeboard Cover

The Harvey Bargeboard Cover is a purpose-designed roofing accessory used to protect and finish the gable ends (bargeboards) of a roof. It provides a weathertight seal while enhancing the visual appearance of roof edges, ensuring a clean, durable, and professional finish. Manufactured from coated steel, it is engineered to integrate seamlessly with Harvey roofing systems.

Specification	Value
Application	Gable ends / bargeboards
Installation	Method Fixed to bargeboards
Approx. Length	1550 mm
Coverage	±4 tile courses
Height	130 mm
Mass	2.3 kg
Orientation	Left- and right-hand serrated options

Key Features & Benefits

Gable End Protection

- Covers and shields exposed bargeboards at roof edges
- Prevents water ingress and wind damage
- Protects roof structure from environmental exposure

Weatherproof Performance

- Reduces risk of leaks at roof edges
- Protects against wind-driven rain and dust ingress
- Enhances overall roof waterproofing

Durable Steel Construction

- Manufactured from corrosion-resistant coated steel
- Designed for long-term performance in harsh conditions
- Matches the durability of Harvey roof tiles

Precision Fit

- Designed for seamless compatibility with Harvey tile systems
- Left- and right-hand serrated options available for correct fitment
- Ensures secure and consistent installation

Clean, Professional Finish

- Provides a neat finish along gable ends
- Conceals exposed edges and battens
- Matches tile colours for a uniform roof appearance

Easy Installation

- Fixed directly to bargeboards at gable ends
- Covers approximately four tile courses per unit
- Lightweight design enables quick installation
