Harvey Angle Ridge End Cap

The Harvey Angle Ridge End Cap is a purpose-designed roofing accessory used to seal and finish the ends of angle ridge sections. It provides a clean, professional termination while enhancing the roof's weatherproofing and durability. Manufactured from high-quality coated steel, it integrates seamlessly with Harvey roofing systems.

Specification	Value
Application	End termination of angle ridge
Fixing Method	Coated steel
Approx. Length	125 mm
Width	90 mm
Height	Fixed to end of Angle Ridge

Key Features & Benefits

Sealed Ridge Termination

- Closes off ridge ends to prevent water ingress
- Ensures a complete roofing system seal

Durable Steel Construction

- Produced from corrosion-resistant coated steel
- Designed for long-term outdoor performance
- Matches the strength and quality of Harvey tiles

Perfect System Fit

- Specifically engineered for Harvey Angle Ridge components
- Provides a precise, secure fit
- Maintains structural integrity of ridge systems

Enhanced Aesthetics

- Creates a neat, finished appearance at ridge ends
- Blends with tile colours and profiles
- Eliminates exposed edges for a professional look

Easy Installation

- Quick and simple installation onto ridge sections
- Compatible with standard Harvey fixing methods
- Minimises installation time on site
