Harvey Roofing Nails (Fasteners)

Harvey Roofing Nails / Fasteners are high-quality fixing components designed to securely install Harvey roof tiles and accessories. Engineered for strength and durability, these fasteners ensure firm tile attachment, resistance to wind uplift, and long-term roof stability in all weather conditions.

Specification	Value
Product Type	Roofing fasteners
Material	High-strength metal
Primary Use	Fixing roof tiles and accessories
Compatibility	Timber tiling battens
Fixing Method	Mechanical fastening
Mass	2.5kg, 5kg, 25kg

Key Features & Benefits

Secure Fixing Performance

- Provides strong and reliable fastening of roof tiles and accessories
- Prevents tile movement under wind and environmental stress

Weather-Resistant Design

- Designed to withstand harsh outdoor conditions
- Resists corrosion and environmental wear
- Maintains long-term performance in exposed roofing applications

Optimised for Harvey Systems

- Specifically suited for Harvey steel-based tiles and accessories
- Ensures compatibility across full roofing system
- Supports correct installation methodology

High Strength Construction

- Manufactured from durable metal for maximum holding power
- Designed to resist loosening over time
- Suitable for both timber and steel batten applications

Easy Installation

- Simple, efficient fixing method
- Enables fast on-site installation
