

NIPPLE

Steam Fittings – EN10242.

A nipple is a short stub of a pipe that has a male pipe thread at each end or at one end. It is used for the connecting of two other fittings, hoses, pipes or valves. Material is used in lower pressure pipe systems. Material can be specialised i.e. threaded one end (TOE); plain one end (POE); bevelled one end (BOE). Material available in black, galvanised and steam.
