

STEEL GUIDE CHANNEL

The 19S steel guide channel is a durable component designed for use with Hillaldam sliding door systems. Finished with a protective red oxide coating for added corrosion resistance, it helps maintain smooth and stable door movement while providing reliable bottom guidance and alignment for sliding doors.

Key Features:

- Durable steel construction for long-lasting performance
- Red oxide coating for added corrosion resistance
- Designed for Hillaldam sliding door systems
- Provides reliable bottom door guidance and alignment
- Helps maintain smooth and stable sliding operation
- Suitable for residential, commercial, and industrial applications
- Compatible with Hillaldam guide and track components
- Available lengths: 2m, 2.4m and 3m
