

GALVANISED LOCKJOINT BRACKET

The A200 lockjoint is a durable galvanised steel bracket designed for use with Hillaldam sliding door systems. Engineered for reliable performance and secure track support, it features a lock joint design that enhances stability and helps ensure smooth, efficient sliding door operation in heavy-duty applications.

Key Features:

- Manufactured from durable galvanised steel
- Designed for Hillaldam sliding door systems
- Lock joint design for improved stability and support
- Provides secure track and door support
- Suitable for heavy-duty sliding door applications
- Corrosion-resistant finish for long-lasting performance
- Helps ensure smooth and reliable sliding operation
- Strong and reliable construction for demanding environments
