

GALVANISED TRACK STOP

The galvanised track stop is designed for use with Hillaldam 100kg sliding door systems. Engineered to control door travel and help prevent overrun, it provides reliable stopping performance while supporting smooth and secure sliding door operation.

Key Features:

- Manufactured from durable galvanised steel
- Designed for Hillaldam 100kg sliding door systems
- Helps prevent doors from over-travelling on the track
- Provides reliable stopping and positioning performance
- Suitable for sliding doors and gates up to 100kg
- Corrosion-resistant finish for long-lasting durability
- Supports smooth and controlled sliding operation
- Suitable for residential, commercial and industrial applications
