

**GALVANISED SHEET | DX51**

A galvanised DX51 graded sheet is a cold rolled base sheet that has been covered with a zinc coating. The sheet is then hot dipped galvanised.

Product Application

Galvanised DX51 sheets are suitable for severe bending without cracking and moderate drawing operations. The coating gives the steel durability and makes it harder to scratch.

Mass per sheet (kg):

| Dimensions | 0.58mm | 0.8mm | 1.2mm |
|------------|--------|--------|--------|
| 2450x1225 | 13.994 | 19.302 | 28.952 |
| 3000x1225 | 17.135 | 23.635 | 35.452 |
