

REDUCING SOCKET

Malleable Cast fitting to EN 10241.

Reducing sockets are used to adapt the bore sizes of pipes, thereby increasing the offering of diameters available with female BSP threaded fittings. Reducing sockets are used to connect two different sizes of pipe similar to that of a concentric reducer. Material available in black or galvanised.

Malleable Cast Black sizes available:

Male diameter (MM)	8	10	15	20	25	32	40	50	65	80	100
Female diameter (MM)	6	8	8								
			10	10							
				15	15	15	15	15			
					20	20	20	20			
						25	25	25			
							32				
								40			
									50	50	50
											50

Malleable Cast Galvanised sizes available:

Male diameter MM	10	15	20	25	32	40	50	65	80	100	150
Female diameter (MM)	8	8	8								
		10	10								
			15	15	15	15	15				
				20	20	20	20				
					25	25	25		25		
						32	32	32			
							40	40	40		
								50	50	50	
									65	65	
										80
