

Galvanised square tubes are hot-rolled, welded tubing in a square shape made from mild steel that are hot-dip galvanised. All tubing is produced in accordance with SANS 657-1.

Product application

The galvanised coating allows this square tubing to be used in outdoor applications, and also in coastal areas as it provides corrosion protection, extending longevity. Applications include carports, balustrading, gate frames, fence posts, and steel frames.

Mass per metre (kg/m)

Outside diameter	Wall thickness								
Dimensions	1.6mm	2mm	2.5mm	3mm	3.5mm	4mm	4.5mm	5mm	6mm
