

**SQUARE TUBING | GRADE Z27523**

Pre-galvanised tube is typically used for outdoor application, especially in coastal regions, as it has strong corrosion resistance properties.

The Z275 grade indicates that the tube is manufactured with a pre-galvanised coil with 230 MPA minimum yield. The Z275 defines the grams per square metre of zinc and is the combined mass of both surfaces. It roughly equates to 20 microns per surface. Standard lengths of material is 6 metres.

Sizes available

Outside Diameter (mm)	Wall Thickness (mm)	Mass per Metre (kg/m)
19.1	1.6	0.99
25	1.6	1.26
31.8	1.6	1.58
38.1	1.6	1.90
50	1.6	2.52
76	1.6	3.76
76	2	4.59
