

## INGCO F CLAMP 120 X 300MM PLASTIC HANDLE

---

The F Clamp's 120mm jaw opening and 300mm throat depth make it suitable for clamping a wide range of materials and sizes. The plastic handle ensures comfortable use, even during extended periods, while the adjustable screw mechanism allows for precise control over the clamping pressure. This clamp is an essential tool for anyone working with materials that need to be held securely in place.

### What Is In The Box

- 1 x Ingco F Clamp with plastic handle (HFCO21201)
- Packed by paper card

### Product Specifications

- Clamp size: 120 x 300mm
- Max clamp force: 450kgs
- Thickness and width of iron ruler: 8 x 30mm
- Diameter of screw thread: 15.3mm
- Cast iron jaws
- Chrome plated carbon steel bar
- Protective pads
- Solid rubber grip

### Product Applications

- Woodworking:
  - Holding pieces of wood together while glue sets.
  - Securing wood to a workbench during cutting, drilling, or sanding.
- Metalworking:
  - Clamping metal pieces during welding or fabrication processes.
  - Holding metal securely for cutting or grinding.
- DIY Projects:
  - Useful in various do-it-yourself projects where materials need to be held together temporarily.
- Assembly and Construction:
  - Holding components in place during assembly or construction.
  - Securing materials while fasteners are being applied.
- Crafts and Hobbies:
  - Providing a stable hold for various crafting and hobby activities.
