

INGCO F CLAMP 50 X 200MM PLASTIC HANDLE

The INGCO F Clamp's 50mm jaw opening and 200mm throat depth make it suitable for clamping medium-sized materials and projects. The plastic handle ensures comfortable use, even during extended periods, while the adjustable screw mechanism allows for precise control over the clamping pressure. This clamp is an essential tool for anyone working with materials that need to be held securely in place, providing stability and accuracy for a variety of tasks.

What Is In The Box

- 1 x Ingco F Clamp with plastic handle (HFCO20502)
- Packed by paper card

Product Specifications

- Clamp size: 50 x 200mm
- Max clamp force: 170kgs
- Thickness and width of iron ruler: 5 x 15mm
- Diameter of screw thread: 11mm
- Cast iron jaws
- Chrome plated carbon steel bar
- Protective pads
- Solid rubber grip

Product Applications

- Woodworking:
 - Gluing: Holding pieces of wood together while glue sets.
 - Cutting, Drilling, Sanding: Securing wood to a workbench for stability and precision.
- Metalworking:
 - Welding, Fabrication: Clamping metal pieces during welding or fabrication processes.
 - Cutting, Grinding: Holding metal securely for precision cutting and grinding tasks.
- DIY Projects:
 - General Use: Holding materials together temporarily in various do-it-yourself projects.
- Assembly and Construction:
 - Component Assembly: Holding parts in place during assembly or construction.
 - Fastening: Securing materials while applying fasteners.
- Crafts and Hobbies:
 - Crafting: Providing a stable hold for various crafting and hobby activities.
- Carpentry:
 - Frame Assembly: Ensuring that frames and other carpentry projects are held firmly while being assembled.
- Repairs:
 - Household Repairs: Assisting in various repair tasks around the home that require materials to be held securely.
