

INGCO G CLAMP 125MM CAST IRON

The G Clamp 125mm Cast Iron is a robust and versatile clamping tool. With its 125mm jaw opening, it's suitable for securing various materials in woodworking, metalworking, and other DIY projects. The cast iron construction ensures durability and strength, allowing for firm grip and stability during use. The G-shaped design provides a good balance of clamping force and reach. Its adjustable screw mechanism enables precise control over the pressure applied, making it adaptable to different material thicknesses. This compact yet powerful clamp is an essential addition to any workshop, offering reliable performance for both professional craftsmen and hobbyists.

What Is In The Box

- 1 x Ingco G Clamp cast iron (HGC0105)
- Packed by paper card

Product Specifications

- Size: 125mm (5")
- Body: Malleable cast iron
- T-shaped thread

Product Applications

- Woodworking:
 - Gluing: Holding pieces of wood together while glue sets.
 - Cutting, Drilling, Sanding: Securing wood to a workbench for stability.
- Metalworking:
 - Welding, Fabrication: Clamping metal pieces during welding or fabrication processes.
 - Cutting, Grinding: Holding metal securely for precision work.
- DIY Projects:
 - General Use: Holding materials together temporarily in various do-it-yourself projects.
- Assembly and Construction:
 - Component Assembly: Holding parts in place during assembly or construction.
 - Fastening: Securing materials while applying fasteners.
- Crafts and Hobbies:
 - Crafting: Providing a stable hold for various crafting and hobby activities.
- Carpentry:
 - Frame Assembly: Ensuring that frames and other carpentry projects are held firmly while being assembled.
- Repairs:
Household Repairs: Assisting in various repair tasks around the home that require materials to be held securely.
