

## MASONRY / CONCRETE DRILL BIT

---

Masonry drill bits, which are also known as concrete drill bits, are suitable for drilling holes into tough materials such as blocks, bricks, concrete or stone without warping or snapping.

### Product Specifications:

Sizes available:

- 5mm x 85mm.
- 6mm x 100mm.
- 6mm x 160mm.
- 8mm x 120mm.
- 8mm x 160mm.
- 10mm x 120mm.
- 12mm x 150mm.
- 14mm x 150mm.

### Product Application:

Ideal for home building and repairs, masonry drill bits are best used with a hammer drill. Ensure the drill bit's diameter matches the diameter of the fastener you plan to use in the drilled hole.
