

INGCO HACKSAW CLAW 220GM FIBREGLASS HANDLE

The 220-gram fiberglass handle offers a lightweight yet durable design, reducing user fatigue during extended use while providing strength and shock absorption. This makes the hammer suitable for both professional and DIY applications across various fields.

What Is In The Box

- 1 x Ingco claw hammer (HCHS8008)
- Packed by label

Product Specifications

- Weight: 220gm
- Material: 45# Carbon Steel
- Design:
 - fiberglass handle
 - dropforged hammerhead
 - heat treated

Product Applications

- General Construction:
 - Driving nails into wood or other materials for framing, roofing, or general building tasks.
 - The hammer head provides the force needed for efficient nail driving.
- Woodworking:
 - Installing or removing nails in various woodworking projects.
 - The balanced weight allows for precise control in delicate woodworking applications.
- Home Repairs:
 - Hanging pictures, assembling furniture, or fixing loose boards.
 - The versatile design makes it suitable for various household repair tasks.
- Nail Removal:
 - Using the claw end to extract nails from wood or other materials.
 - The curved claw provides leverage for easier nail removal.
- Demolition Work:
 - Light demolition tasks such as removing drywall or breaking apart small wooden structures.
 - The hammer can be used to strike and break materials, while the claw assists in prying.
- Landscaping:
 - Setting stakes for plants or temporary structures in gardening projects.
 - The hammer end can drive stakes, while the claw can help remove them.
- Metalworking:
 - Shaping or bending thin metal sheets or wires.
 - The hammer face can be used for light metalworking tasks.
- Automotive Work:
 - Light tapping or prying in automotive repair tasks.
 - Useful for various minor adjustments or part installations in vehicle maintenance.
- Upholstery:
 - Tacking fabric or removing staples in furniture upholstery work.
 - The hammer head can drive tacks, while the claw can remove staples or tacks.
- Camping and Outdoor Use:
 - Setting up tents, driving stakes, or general campsite construction.
 - The fiberglass handle provides durability and weather resistance for outdoor use.
