

## INGCO HACKSAW FRAME 300MM

---

The hacksaw frame with a soft grip and 300mm length is a hand tool used primarily for cutting metal, plastic, and other hard materials. This tool is commonly used by plumbers, electricians, metalworkers, and DIY enthusiasts for a variety of cutting tasks in construction, renovation, and repair work.

### What Is In The Box

- 1 x Ingco hacksaw frame (HHFS3068)
- 1 Pcs 65Mn saw blade
- Packed by paper card

### Product Specifications

- Size: 300mm (12")
- Design: Adjustable with soft grip
- Suitability: Cutting:
  - metal
  - plastic
  - wood

### Product Applications

- Metalworking:
  - Cutting: Sawing through metal pipes, rods, bolts, and sheets.
  - Fabrication: Precise cutting of metal components for various projects.
- Plumbing:
  - Pipe Cutting: Trimming metal or plastic pipes to size.
  - Fitting Adjustments: Modifying plumbing fittings as needed.
- Electrical Work:
  - Conduit Cutting: Sizing metal or plastic conduits for electrical installations.
  - Cable Tray Modifications: Adjusting metal cable trays to fit specific spaces.
- Construction:
  - General Cutting: Cutting various hard materials on construction sites.
  - Renovation Work: Removing or modifying existing metal fixtures or components.
- DIY Projects:
  - Home Improvements: Cutting metal or plastic materials for various household projects.
  - Custom Fabrication: Creating or modifying metal parts for DIY builds.
- Automotive:
  - Repair Work: Cutting metal components during vehicle repairs or modifications.
  - Custom Fabrication: Creating or modifying parts for automotive projects.
- Woodworking:
  - Cutting Hardware: Trimming metal fasteners, hinges, or other hardware to size.
  - Plastic Cutting: Cutting plastic components or laminates when needed.
