## **MACSTEEL**

## TIN SNIP AVIATION STRAIGHT CUTTER

The tin snip, also known as shears, is a specialized hand tool designed for cutting sheet metal up to 1.2mm and stainless steel up to 0.7mm. It features professional quality steel blades and compound leverage handles, which reduce the effort required for cutting. While optimized for straight cuts, it can also navigate cutting gentle curves. This hand tool is ideal for DIY projects, and is commonly used in HVAC, roofing, and metalworking tasks. These cutters are colour-coded yellow for easy identification of their straight-cutting capability.
