

INGCO 20V HANDHELD VACUUM 0.7L

The five different accessories can meet various needs in different places. The crevice nozzle works well to clean in-between small spaces, such as air conditioning outlets. The dust brush is ideal for cleaning sofas, whilst the floor brush makes for easy floor cleaning. The flexible extension hose bends at many angles, making cleaning easier. The two extension tubes can extend the operation range, so that you can stand and use the vacuum cleaner. The 2-speed regulation function can meet different cleaning needs, from car, kitchen to bedroom.
