MACSTEEL

Data Sheet

Μ

WIRE BRAZING BRUSH

Wire brushes have many uses, such as cleaning and preparing metal surfaces for welding, painting, or bonding. They are also effective for removing rust or paint, smoothing rough edges or removing burrs from metal parts, maintaining and cleaning tools, grills, and machinery, and cleaning grout from tiles. These brushes have heavy-duty steel bristles and wooden handles.

Specifications:

Height: 5.2cm.

Length: 29cm.

Width: 4cm.

Wire Rows: 5.
