

WHEEL KIT 100HD

This wheel kit offers a good load-carrying capacity and longer life due to the larger diameter of the wheel.

Product Specifications:

- Slim line weld-on side plates for low gate clearance.
- Self-cleaning properties and low rolling resistance.
- V profile designed for use on a 20mm diameter round track.
- Uses the 6204 ZZ bearing and 20mm diameter shaft.
- Kit includes 2 wheel assemblies and 2 roller guides.

Product Application:

Ideal for use in townhouse and cluster complexes, as well as commercial and industrial applications where the gate mass does not exceed 778 kilograms. For best results, use with a 20mm diameter EN8 bright track.
